Summary

Data Science and AI professional with 1+ year of experience working on enterprise-scale data systems, backend services, and AI/ML-based solutions. Strong expertise in Python, SQL, data preprocessing, exploratory data analysis (EDA), and machine learning concepts. Hands-on experience developing FastAPI-based backend systems, RAG applications, and structured data workflows. Skilled in analyzing large datasets, identifying patterns, and building scalable AI-driven solutions. Passionate about leveraging data science and AI to solve real-world business problems in manufacturing and enterprise environments.

Education

SR University

Sep 2021 - Jun 2024

Bachelor of Technology in Electrical and Electronics (CGPA: 9.03)

Warangal, India

Professional Experience

Accenture

Aug 2024 - Present

Software Engineer (Salesforce Developer)

Hyderabad, India

- Worked extensively with structured enterprise datasets using SQL, SOQL, and Salesforce data models for backend business processes.
- Designed and optimized SQL/PLSQL queries, improving backend data retrieval efficiency and reducing query execution time.
- Collaborated with cross-functional stakeholders to gather business requirements and deliver scalable CRM and data-driven solutions.
- Supported regression testing and release validation, ensuring zero critical post-production defects in recent deployments.
- Worked within Agile SDLC environments and collaborated closely with engineering and product teams.
- Debugged and resolved 20+ defects, improving system reliability and reducing production issues.

Bosch Global Software Technologies

Feb 2024 - June 2024

AI/ML Project Intern

Coimbatore, India

- Developed AI-enabled backend services using Python and FastAPI for intelligent automation workflows.
- Performed data preprocessing, validation, cleansing, and structured logging for AI/ML workflows.
- Worked with large structured datasets and implemented exploratory data analysis techniques for model preparation.
- Collaborated using Git and GitHub across multiple feature branches with 100+ commits following code review best practices.
- Gained exposure to manufacturing and automotive-related AI use cases during internship projects.
- Implemented structured logging, validation, and debugging processes.

Technical Skills

Data Science and ML: Deep Learning, ANN, Clustering concepts, EDA, Data Preprocessing, Classification Models.

Programming: Python, SQL, PL/SQL, SOQL

GenAI & AI Technologies: Large Language Models (LLMs), LangChain, RAG (Retrieval-Augmented Generation), HuggingFace, Prompt Engineering

Frameworks & Tools: FastAPI, Git, GitHub, PyTorch, REST APIs

Concepts: SDLC, OOP, Data Structures & Algorithms, Agile Methodology

Cloud & Deployment: Basic AWS knowledge, CI/CD Concepts

Projects

RAG-BASED KNOWLEDGE ASSISTANT

2024[[Github](#)]

- Designed a Retrieval-Augmented Generation (RAG) system using Python.
- Integrated LLMs to enable intelligent query-based knowledge retrieval.

Predictive Mechanism for Faults in EV Batteries using ANN

2023[[Dataset](#)]

- Built an ANN-based fault detection system for EV batteries.
- Analyzed 100,000+ data points to improve fault prediction accuracy by 30%.

Achievements

- Trained as a Salesforce Developer (Hands-on experience in Apex, SOQL, and CRM workflows)
- National Level EV Hackathon Winner (Bosch & IEEE)
- Oracle Apex Cloud Certified Developer Professional (Oracle University)
- AI/ML Internship Experience
